Volume 189 1988

Contents

Letters to the Editor

Tentative detection of CH_3NC towards Sgr B2
Cernicharo, J., Kahane, C., Guélin, M., Gomez-Gonzalez, J. L1

Direct observation of a disk in a very icy circumstellar envelope: IRAS 09371+1212 the "Frosty Leo nebula"
Rouan, D., Omont, A., Lacombe, F., Forveille, T. L3

Periodic light variations of the central star of Abell 35
Jasniewicz, G., Acker, A. L7

Do the LMC supernova data give evidence for neutrino masses?
Evans, D., Fong, R., Collins, P.D.B. L10

Laboratory detection of the C_6H radical
Pearson, J.C, Gottlieb, C.A., Woodward, D.R., Thaddeus, P. L13

Cosmology

(RN) New determination of the pole of a "hypergalactic" large-scale system
Paturel, G., Bottinelli, L., Gouguenheim, L., Fouqué, P. 1

(RN) Comments on a possible change with cosmological time in the rest masses of particles
Wesson, P.S. 4

Extragalactic astronomy

10.7 GHz observations of Markarian/Seyfert galaxies
Israel, F.P., Seielstad, G.A., Berge, G.L. 7

Low luminosity radio galaxies: effects of gaseous environment
Morganti, R., Fanti, R., Gioia, I.M., Harris, D.E., Parma, P., de Ruiter, H. 11

Young stellar content of nearby galaxies. I. NGC 300
Pierre, M., Azzopardi, M. 27

The number of Wolf-Rayet stars in Local Group galaxies
Azzopardi, M., Lequeux, J., Maeder, A. 34

Radio sources and environmental effects in E and S0 galaxies
Vettolani, G., Gregorini, L. 39

How frequent are tidal interactions between galaxies?
Fried, J.W. 42

(RN) Geometrical patterns of astrophysical jets
Zaninetti, L., Van Horn, H.M. 45

Galactic structure and dynamics

High energy ($\geqq$10 GeV/N) deuterons in cosmic rays and charge dependence on their path lengths
Durgaprasad, N., Kunte, P.K. 51

(RN) Galactic evolution of the light-element isotopes
Abia, C., Canal, R. 55

Kinematics of ionized gas in the spiral galaxy NGC 6946
Bonnarel, F., Boulesteix, J., Georgelin, Y.P., Lecoarer, E., Marcelin, M., Bacon, R., Monnet, G. 59

Stellar clusters and associations

Open clusters and galactic structure
Pandey, A.K., Bhatt, B.C., Mahra, H.S. 66

The galactic globular cluster system: period-shift versus metallicity and the case of ω Centauri
Caputo, F. 70

Formation, structure and evolution of stars

Theoretical characteristics of WR+O binaries
De Greve, J.P., Hellings, P., van den Heuvel, E.P.J. 74

Photometric and spectrographic study of the runaway star 53 Arietis
Sterken, C. 81

Observations and analysis of the light curve of the WUMa system AE Phoenicis during 1975–1977
Walter, K., Duerbeck, H.W. 89

Near-infrared spectral classification of symbiotic stars
Schulte-Ladbeck, R.E. 97

The subphotospherical velocity structure of the WR component of V 444 Cygni
Vanbeveren, D. 109

Ultraviolet observations of AM Her
Heise, J., Verbunt, F. 112

Flares on AM Canum Venaticorum
Marar, T.M.K., Padmini, V.N., Seetha, S., Narayanan Kutty, K.R., Kasturirangan, K., Rao, U.R., Bhattacharyya, J.C. 119

(RN) A typical SS 433 VLBI radio structure
Fejes, I., Schilizzi, R.T., Vermeulen, R.C. 124

(RN) The hard X-ray eclipse in the intermediate polar EX Hydrae
Beuermann, K., Osborne, J.P. 128

Stellar atmospheres

Rotation of T Tauri stars in the Chamaeleon dark clouds
Franchini, M., Magazzù, A., Stalio, R. 132

An atmosphere analysis of the β Cephei star σ Sco
vander Linden, D., Butler, K. 137

High-resolution emission-line spectroscopy of Be stars. III. Balmer line profiles
Hanuschik, R.W., Kozok, J.R., Kaiser, D. 147

Radiative fluxes from the outer atmosphere of a star like the Sun: a construction kit
Schrijver, C.J. 163

The intrinsic colour calibration of Strömgren photometry for F-type stars
Olsen, E.H. 173

The diagnosis of stellar magnetic fields from spectral line profiles recorded in circularly polarized light
Mathys, G. 179

Spectrum analysis of the extremely metal-poor carbon dwarf star G 77-61
Gass, H., Liebert, J., Wehrse, R. 194

(RN) Are tides responsible for enhanced Mg II emission in late-type binaries?
Glebocki, R., Stawikowski, A. 199

(RN) Discrete absorption components: a study of the gas parcel model using component velocity observations
Halliwell, D.R., Bates, B., Catney, M.G. 204

Diffuse matter in space (including HII regions and planetary nebulae)

A molecular study of the dark clouds L 1506 and L 1529 in Taurus
Nercessian, E., Castets, A., Cernicharo, J., Benayoun, J.J. 207

The structure of the diffuse interstellar bands
Westerlund, B.E., Krelowski, J. 221

The Sun

A two-component working model for the atmosphere of a large sunspot umbra
Obridko, V.N., Staude, J. 232

NLTE effects in solar magnetic fluxtubes
Solanki, S.K., Steenbock, W. 243

Collisionless shock formation and the prompt acceleration of solar flare ions
Cargill, P.J., Goodrich, C.C., Vlahos, L. 254

Velocity and temperature in solar magnetic fluxtubes from a statistical centre-to-limb analysis
Pantellini, F.G.E., Solanki,S.K., Stenflo, J.O. 263

The solar system

(RN) Observations of mutual phenomena of the Galilean satellites of Jupiter made at CERGA
Froeschlé, M., Helmer, G., Meyer, C. 277

Meteoroids from comets Arend-Roland 1957 III and Seki-Lines 1962 III
Fulle, M. 281

Celestial mechanics and astrometry

A method for the derivation of precession expressions
Zhang, H., Huang, T.-Y., Xu, B.-X. 292

Representation of catalogue systematic errors in right ascension and declination inferred from astrolabe data
Benevides-Soares, P. 297

1982–1984 observations of Nereid. New orbital determination
Veillet, C., Bois, E. 303

Physical and chemical processes

High energy gamma-astronomy with large underground detectors. DUMAND-detector of high energy gamma-quanta
Berezinsky, V.S., Cini-Castagnoli, G., Kudryavtsev, V.A., Ryazhskaya, O.G., Zatsepin, G.T. 306

Coulomb free-free Gaunt factors
Carson, T.R. 319

The cyclotron spectrum of VV Puppis
Canalle, J.B.G., Opher, R. 325

A numerical study of cylindrically symmetric accretion flow
de Kool, M., Savonije, G.J. 331

Modified non-linear Burgers' equations and cosmic ray shocks
Zank, G.P., Webb, G.M., McKenzie, J.F. 338

Instruments, data processing, and computational methods

The Reticon spectrophotometer of the Merate Observatory
Bonanno, G., Palomo, R. 349

First results with a transmission echelle grating on the ESO Faint Object Spectrograph: observations of the SN 1986 A in NGC 3367 and of the nucleus of the galaxy
Dekker, H., D'Odorico, S., Arsenault, R. 353

(RN) A comparison of two self-calibration techniques for radio interferometric data
Yang Yi-Pei 361

Thesaurus of key words used in the annual subject indexes 365
